Sales vs Profit Analysis

Profit by Region

- Profit is heavily concentrated in specific sub-categories and regions
- Several products generate high revenue but fail to translate into profit
- Consumer segment dominates profitability, increasing dependency risk
- Regional disparities suggest opportunities for operational improvement
- Business should focus on optimizing low-profit sub-categories and underperforming regions

Customer Behavior • Order Patterns • Business Efficiency

Revenue by Customer Segment

Sales by Shipping Mode

Customer & Operational Insights

- Revenue is heavily concentrated in the West region, while the South region underperforms
- Consumer segment plays a key role in driving revenue, indicating dependency on a single customer group
- Customers strongly prefer Standard Class shipping, highlighting cost sensitivity over delivery speed
- Lower adoption of premium shipping options suggests opportunity for pricing or service optimization
- Geographic and behavioral patterns reveal opportunities for targeted growth strategies
